Subject: Microsoft

I believe that the government has spent enough tax payers money and has caused enough money to be lost by owners of technology stocks and mutual funds to end this nonsense abuse of power. Microsoft was wrong in how they conducted business, but people knew it and have always had a choice of software to use. It may be preloaded, but you don't have to use it. This witch hunt for Microsoft is worst. What is the next business that conducts business in the US will get to big so the government will step in and break it up? The government is to big, break it up instead. Stop and let Microsoft resume business, capitalism to remain, and confidence in technology sector of our economy to resume.
